Annabella Fire Contained

Richfield Ut.---No serious fire activity was observed and crews continued to mop up. Resources are being demobed and made available for reassignment to other incidents.

Rehabilitation of firelines has begun.

Windy conditions did not allow the completion of an infrared flight to determine any remaining hot spots.

Tomorrow's Planned Activity: Suppression forces will continue to mop up and rehab fire lines.

An infrared flight is again planned for the early morning to detect any hot spots not currently identified

Demobilization of forces will continue including the initial attack group which had been established in Richfield.

The spike camp at Big Lake will be removed.

A Type 3 helicopter is in place for support of fire suppression activities, shuttling personnel and supplies where they are needed, and hauling back haul from the fire.

Official transfer of command back to the home unit is planned for 0600

Other Important Messages: Even though the weather has moderated and temperatures have dropped, the fuels in the back country are still extremely dry. Caution should be used by all those using public lands during all outdoor activities.
